

POP AND LEARN!TM Bubble Boards

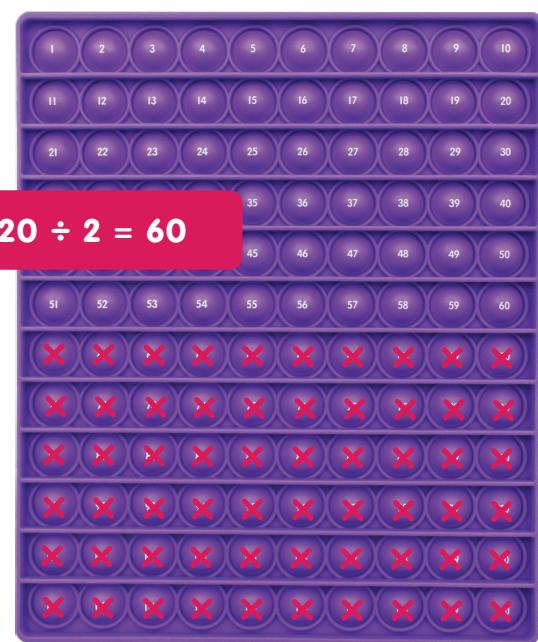

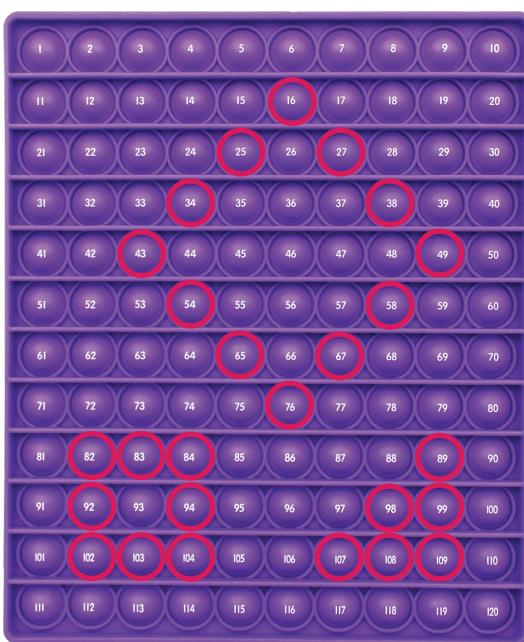

120s Activity Sheet

JL677

Number Battleship

Two players sit back to back (or with divider). Write down a series of numbers representing ships and say 'hit' or 'miss' when your opponent tries to guess.

$$120 \div 2 = 60$$

Patterns on the 120 Board

Make patterns on the 120 board. Right down the rule or equations.

Fractions of 120

Divide the board into halves or quarters by popping the bubbles. How many bubbles in each section? Write the equation.

101, 102, 103...

Counting on past 100

Use the 120 board to count past 100 by popping bubbles.

Number Bonds to 120

Pop a random number on the 120s board. How many more to make 100? Write down the equation.

Race to 120

Roll a die or use number cards (including +10) to race across the 120s board. First to the finish is the winner.
