

Name _____

A Place to Live

Compare different kinds of houses and how they are built.

| Type of structure | Materials used | Climate | Reasons for design |
|------------------------------|------------------|--------------------------------|--|
| Igloo | Solid ice bricks | Extremely cold Ice and snow | An igloo is dome shaped, which keeps the heat in. Igloos are quick to build. |
| Grass hut | | | |
| Tepee | | | |
| House built on stilts | | | |
| High-rise apartment | | | |

S Investigating the materials that are used to build houses
