

Name \_\_\_\_\_

# Last Seen

Why might a species be **vulnerable** to extinction? What human actions could cause the extinction? How could people have acted differently to avoid this happening? Find an example in the text or from your own research, then complete the chart.

**Species:** \_\_\_\_\_

| Why was it vulnerable? | What did people do?<br>(causes) | What happened?<br>(effects) | How could people have<br>acted differently? |
|------------------------|---------------------------------|-----------------------------|---------------------------------------------|
|                        |                                 |                             |                                             |

**vulnerable:** being open to attack or harm

- S** Identifying cause-and-effect relationships
- S** Exploring reasons for the extinction of plants and animals and how people have contributed to this process
