Prepare your device

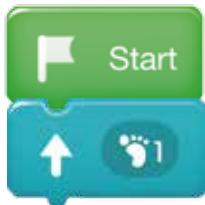

What to learn

Use the movement command  to make
the military truck move.

Let's get it started!

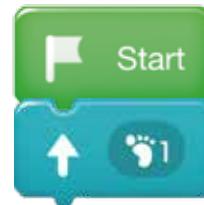

1. Make the military truck move one steps forward.

2. Make the military truck move three steps forward.

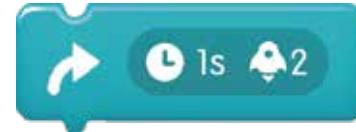

3. Make the military truck move three steps forward by adjusting the parameter.

Remember to click "✓" after
adjust the steps.

Try these commands below!

Have a try

1. Building task

Try to design and build a new military truck for the military parade!

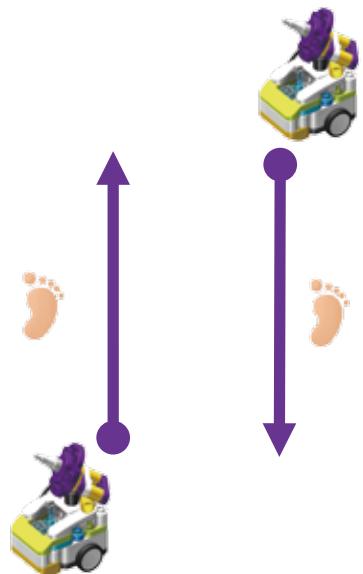

Have a try

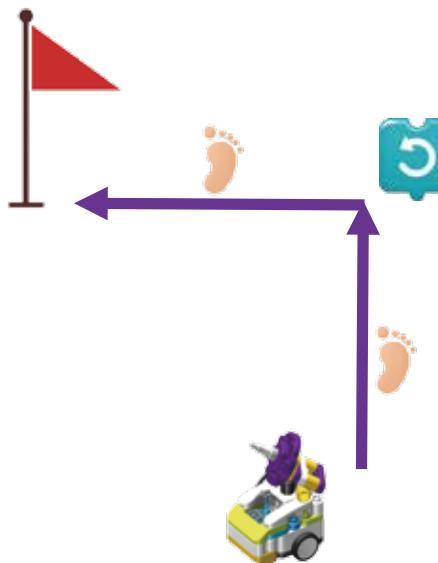

2. Programming task

Make your military truck follow the routes below!
